Serviced Office Space UK

75 - 77 High Street

Croydon CR0 1QE

Located in the heart of Croydon and only 20 minutes away from Central London, this technical hub offers you access to all the local markets, pubs, restaurants, retail shops, banks and supermarkets available in the area. Considered to be London's fastest growing tech cluster, Croydon is an ideal location for tech individuals to start a business or for existing tech companies to flourish. This centre community cares passionately about being a part of the local community here in Croydon and making a positive impact, so from the very beginning this space has striven to employ locally and source products from local providers.

This space offers a whopping 450+ desks in shared and private office spaces, a 6,000 sq ft event space large enough for 300 attendees, a multi-award winning café named BYTE and a host of free facilities (podcast booths, boardrooms and meeting rooms, hammock and chillout space, audio/phone booths with acoustic foam) and a ton of freebies (printing, 3D printers, scanners, ultrafast gigabit wifi, private network VPNs etc). This is a hub and an ecosystem for the "doers" of the world with a management team and board hailing from the tech industry with backgrounds in investing, building, scaling and/or managing startups - a refreshing change from property landlords focused on the rent only. Here you will always find an open door to help you tackle a challenge or a drama, because the founders understand that building a business is extremely hard, where you have the ability to get introduced to a big network of industry giants, tech CEOs with outstanding track records and investors both big and small. The number 1 coworking and office space for innovators, creatives, tech nerds, VR and goggle bearers. This hub is located in Croydon, the new hotspot for tech startups and now officially the fastest growing Tech City. Sitting only 15-minutes from Victoria station and 20-minutes from London Bridge, this is where you want to be to see your dreams come true. The community is overflowing with real entrepreneurs, creatives and tech people, not posers or wannabes. You will have plenty of chances to rub shoulders, connect, collaborate and be inspired by the like minded souls gathered here. Coworking members can do their stuff at a shared or dedicated desk or take over 1 of the 10 private offices.
